

Uganda Government Livestock Sector Prioritization in Uganda under the Agriculture Sector Strategic Plan (ASSP)

Juliet Sentumbwe

Ministry of Agriculture, Animal Industry and Fisheries, Uganda

Uganda Livestock Sector Consultative Meeting, Kampala, 14 March 2017

Sector Contribution

To:

- Wealth creation
- Employment by

Implementing actions for the value chain development of identified commodities

Focus Commodities

Priority Commodities

- Bananas, beans, maize, rice, cassava, tea, coffee, fruits and vegetables, **dairy**, **fish**, **meat**, and, namely, cocoa, cotton, oil seeds, and oil palm.

Strategic Commodities

- Cocoa, cotton, oil seeds, and oil palm

Sector focus

- Increasing production and productivity;
 - Addressing challenges in critical farm inputs, mechanization and Water for Agricultural Production;
 - Improving agricultural markets and value addition in the 12 prioritized commodities; and,
 - Institutional strengthening for agricultural development.
- 

Summary of Minimum Value Chain Activities For The Priority Strategic Commodities

Meat (Beef cattle, Goats, Poultry, Pork)

- Provide an enabling environment and data collection for the meat Sector.
- Enhance beef cattle, goat, poultry, pork and productive entomology production and productivity
- Improve meat hygiene services and development of meat industry marketing infrastructure
- Enhancing productivity and export potential of commodities from productive insects

Dairy

- Strengthen the dairy sector regulatory frame-work
- Promote local consumption and export of milk and dairy products
- Rehabilitate existing and develop new milk cold chain and processing infrastructure

Dairy (cont'd)

- Strengthen milk quality assurance system (laboratories, lab technologists, training in hygienic milk handling along the whole dairy value chain).
- Build local capacity in feed production and marketing (conserved feed, pasture and rangeland improvement)
- Enhance availability for improved dairy germplasm

Dairy (cont'd)

- Development of a national breeding programme and breeding guidelines
- Develop the national dairy herd information management system
- Build local and National capacity for on-farm animal disease and vector control and management.

Fisheries

- Promote recovery of depleted stocks of the large commercial fishes
- Develop the fishery of small pelagic fishes
- Promote aquaculture to a commercial level.

Livestock and Fisheries Production Targets for 2015/16 - 2019/20

Commodity	Units	Baseline 2014/15	2015/16	2016/17	2017/18	2018/19	2019/20
Meat	MTs	389,163	404,730	420,919	437,756	455,265	473,476
(a) Cattle	MTs	202,929	211,046	219,488	228,268	237,398	246,894
(b) Goats	MTs	38,380	39,915	41,512	43,172	44,899	46,695
(c) Pork	MTs	22,138	23,024	23,944	24,902	25,898	26,934
(d) Poultry	MTs	46,313	48,166	50,092	52,096	54,180	56,347
(e) Eggs	MTs	71,492	74,352	77,326	80,419	83,636	86,981
(f) Hides/Skins	MTs	7,911	8,227	8,557	8,899	9,254	9,625
Dairy	MTs	2,080,000	2,220,000	2,360,000	2,500,000	2,648,305	2,805,408
Fisheries	MTs	461,726	554,000	583,000	630,000	681,000	737,000

MAAIF Role

- Setting laws, policies, standards and guidelines
- Technical backstopping
- Supervision and monitoring
- Capacity building for staff
- Regulation

SUPPORT, PROMOTE AND GUIDE

Required linkages

- Agro-processing,
- Infrastructure,
- Storage
- Marketing
- Capacity building for VC players

Welcome Aboard

Thank you for listening
